

## Smart SM110E

---

<b>TYPE</b>	Pass-through dishwasher
<b>LINE</b>	SMART LINE
<b>BASKET</b>	500x500
<b>SIZE</b>	620x770x1470/1930h

---

The dishwashers of the SMART line ensure maximum performance thanks to the standard Acquatech System which, through an atmospheric boiler and rinse pump, maintains constant temperature and pressure and optimum water consumption. SMART ensures a sanitising rinse cycle and proves to be the perfect choice for canteens, nursing homes, pastry shops, bakers and butchers where compliance with HACCP rules is essential. For those who seek glass perfection, it is possible to connect a Reverse Osmosis System which purifies water and reduces detergent and rinse-aid consumption, ensuring excellent results and perfect glasses without the need for hand drying.

The SM110E hood dishwasher is the right solution for businesses that are faced with washing a variety of dishes, proving capable of washing glasses, plates, medium-sized items and GN 1/1 trays in just 620 mm width, providing a maximum throughput of 60 baskets/hour (1080 dishes/hour). The hood models feature an easily removable basket support for easy cleaning and a rounded moulded tub with integral filters to ensure perfect drainage and absolute hygiene. The 'PUSH TO START' cycle start system ensures less waste by preventing the start of empty washes.

The electronic control allows you to manage various parameters to give you an absolute customisation level and the continuous self-diagnosis allows you to minimise machine downtime, suggesting some operations to be verified. The self-cleaning cycle at the end of the day cleans the wash tank and empties the boiler from the hot water, preventing limestone forming inside. The bodywork is made entirely of AISI 304 steel and has been designed with all components in the front to allow easy technical assistance. Sturdy and reliable dishwashers to best deal with every moment of your day.
